

TECHNICAL DATA SHEET EDITION: 12/11/17

PRODUCT CODE: D314 PLASTIC WELDER

D314 PLASTIC WELDER

2 Part Methacrylate Structural Adhesive

PRODUCT DESCRIPTION

Delta D314 Plastic Welder Adhesive is a 1:1 methacrylate based adhesive, designed for general purpose bonding of a wide variety of materials in diverse applications. It is a fast setting, non sagging paste with superior peel, shear and impact resistance. D314 can be as strong a welded joint, bonding and sealing simultaneously, whilst eliminating corrosion and warping.

AREAS OF USE

Permanent bonding and sealing in automotive bodywork, metal fabrication, marine construction, GRP and carbon fibre bonding, and specialist architectural/construction work. Especially useful in bonding dissimilar materials such as plastics to metals and is designed to be used in areas considered to be load bearing. Can be used in external and extreme environments due to its excellent temperature and chemical resistance.

PROPERTIES

1:1 Mixing ratio in 25ml manual syringe pack. Excellent adhesion properties, even without primer on a wide range of materials, such as metals, plastics and ceramics. Bonds to unprepared surfaces, especially most metal types. Remains slightly flexible giving an ability to resist vibration and temperature variations. Cures at room temperature and has excellent environmental resistance in terms of humidity, temperature and chemicals.

DIRECTIONS FOR USE

Clean and degrease the substrate with a suitable, non aggressive solvent or Delta Cleaning Wipes. Snap syringe cap off, this can be used to reseal the pack. The preset volumes ensure the correct ratio of material is dispensed, mix components together and apply. If applicable smooth surface with plastic spatula. Thickness of layer depends on nature of material. Apply counterpart substrate immediately. The curing time depends on amount of material used and temperature.

TECHNICAL DATA

Base 2 Part Methacrylate Polymer curing by chemical reaction without solvents. Colour Off White Consistency Paste, slighty thixotropic, non-sagging, spreadable Density at 23°C Part A: 0.96 g/cm³ - Part B: B: 0.91 g/cm³ Part A: 55000cps - Part B: B: 50000cps Viscosity at 23°C Mix ratio by weight 1 to 1 7 Minutes Working time @ 22°C 15 Minutes Fixture time @ 22°C 45-60 minutes sanding and paintable Functional cure 22°C After 24 hours Full cure @ 22°C Service Temperature -55°C to +120°C, Range (-55°C to +200°C intermittent) Elongation 15-20% Gap filling Up to 3mm Hardness Shore D 78 at full cure Shelf life 12 months in unopened packaging Storage conditions Cool and dry

Cure Properties

Adhesive Tensile Shear - ASTM D1002

Steel/steel	>4000 psi
Aluminium/aluminium	>3400 psi
GRP/GRP	Substrate failure
ABS/ABS	Substrate failure

T-Peel Strength-ASTM D1876

2

Steel/steel	6-7 N/mm
Aluminium/aluminium	2.6-3.5 N/mm

PART STRUCTURAL

D314 2/3

HEALTH AND SAFETY

Keep out of reach of children. Refer to product material Safety Data Sheet (MSDS)
