

RED RUBBER GREASE

PRODUCT DESCRIPTION

Delta Red Rubber Grease is a premium quality lubricating grease manufactured using biodegradable vegetable oil and thickened with non-soap bentonite coupled with corrosion and oxidation inhibitors. The nature of the product composition make it resistant to hydrocarbon solvents, fuel oils and chemicals while giving a product which is compatible with natural, SBR (styrene butadiene rubber) and other common engineering seal products.

AREAS OF USE

Delta Red Rubber Grease is designed for use on automotive brake assemblies, rubber components and hydraulic systems. It also is very useful for use with gland packing and seals due to its resistance to lubricating oil. For use where contact with any rubber is anticipated due to its ability to prevent rubber swelling.

DIRECTIONS FOR USE

No degreasing is required before treatment but parts should be cleaned. A smear, applied with finger, pad or brush, on components surfaces will be sufficient to provide treatment through the movement of related parts once the mechanism is assembled. Rubbing the compound intensely into mating surfaces where ever practicable will result in a film of greater performance.

TECHNICAL DATA	Base	Gelled vegetable oil
	Appearance	Red thixotropic grease
	Texture	Smooth
	NLGI Grade	No 2
	Drop Point	None-infusible
	Working Temperature Range	-40°C to +110°C
	Water Solubility	Insoluble
	Thickener	Non-soap Bentone

HEALTH AND SAFETY

- Refer to the relevant Material Safety Data Sheet (MSDS).

PACKAGING

- 500gm tub
